

## Mobile Phone (Social Media) Policy

Mobile phones today generally have a camera, and it is very easy to upload photos/videos to various “sharing” websites. We do not allow the use of mobiles phones in our home to take photos by any visiting parents, or indeed any other invited individuals.

You will have already signed a consent form allowing us to take photos of your child for use in the emailed daily diary, but you can be assured that images of your child will be strictly controlled to consensual use only.

We however reserve the right to take photos of our children whilst in our presence during the working week. These photos are of course for our own personal, private use only, and are not for public diffusion.
